Software for IP Law Firms. By Patrafee.

The comprehensive software application that makes your IP management **client oriented, efficient and reliable.**

By and for IP law firms

Patrawin® is possibly the most comprehensive software on the market for managing intellectual property rights. Not only does Patrawin® enable you to meet the needs of your clients simply, it also makes the work you do in your own organisation far more efficient. The functions in Patrawin® have been developed over three decades in close cooperation with several leading IP law firms.

Electronic document management

Text documents, spreadsheets, drawings, scanned documents and email can all be saved in its well-designed document management system. There are also functions for delegating documents and workflows, managing original documentation and read/write authorisation rights. You can do a full text search on any file, including scanned documents.

Online interface for your clients

You can distribute IP information very easily to your clients with the fully integrated online tool IPR Control.

Time and invoicing module

The fully integrated accounts module includes functions for invoicing, internal time reporting and financial history of both items and clients. This module allows you to keep control of expenses and issuing your own invoices more effectively. Invoices can be generated automatically or manually and simply exported to in-house accounts systems.

Compatible

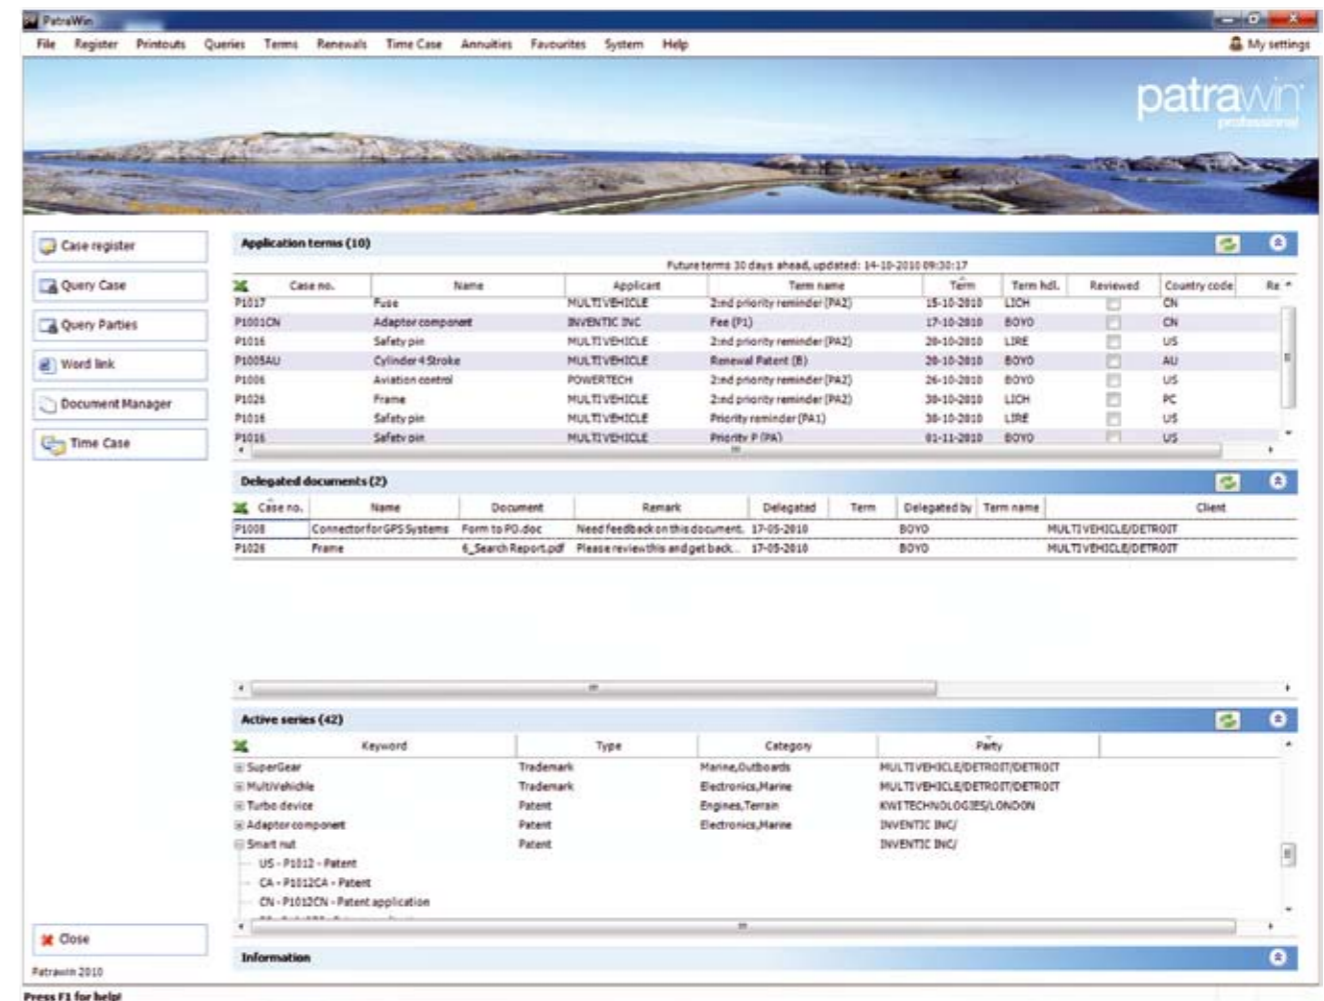

Patrawin can communicate with and export data to various applications including Word, Excel and Outlook. It can also interface with epoline®.

Helpdesk support

Our highly knowledgeable helpdesk personnel are always happy to answer your questions and provide additional support whenever you need it.

No changes necessary

All case numbers, customer numbers and similar client-specific details can remain unchanged in Patrawin®. Deadlines can also be structured and linked together in the way your company prefers to do this.

PATRAWIN | IP MANAGEMENT SOFTWARE

For such a sophisticated application, installation is very simple. And once installed, Patrawin® will be fully operational very quickly. Which adds up to fewer consultant fees and with it, lower start up costs. Implementation times can vary depending on your specific circumstances and requirements, but as a rule, they are far shorter than rival software packages.
